

Aishwarya T

Software Engineer | Backend Developer | Full Stack Developer

Bengaluru, India | 9686944325 | aishwaryatuppad082@gmail.com

GitHub: github.com/AishwaryaT-18 | LinkedIn: linkedin.com/in/aishwarya-t-31174a238

Professional Summary

Software Engineer with professional experience in backend development, database optimization, and enterprise application development. Proficient in PHP, Python, Java, JavaScript, MySQL, REST APIs, Git, and Agile methodologies. Experienced in designing scalable backend systems, optimizing application performance, integrating APIs, and resolving complex production issues. Strong analytical and problem-solving skills with practical exposure to Machine Learning, Flask, and Generative AI. Committed to building reliable, maintainable, and high-quality software solutions.

Technical Skills

Languages: PHP, Java, Python, JavaScript, SQL

Web Technologies: HTML5, CSS3, Bootstrap, jQuery, AJAX, JSON, XML

Backend: PHP, Spring Boot, REST API Development

Databases: MySQL

Tools: Git, GitHub, Jira, Postman, Swagger, VS Code, Eclipse, Jupyter Notebook, PyCharm

Core Concepts: OOP, Data Structures & Algorithms, CRUD Operations, API Development, Database Design, Performance Optimization, Debugging, Agile Development, Software Testing, Unit Testing (Basic)

Professional Experience

Software Engineer | Tulasi Technologies | 2025–Present

Project: ERP for Poultry Farm Management

- Developed and maintained scalable ERP modules for Poultry Farm Management using PHP and MySQL.
- Designed backend business logic for inventory, feed planning, flock management, warehouse operations, and reporting.
- Optimized complex SQL queries, improving report generation performance.
- Debugged and resolved production issues through root cause analysis, ensuring application stability.
- Developed responsive web interfaces using JavaScript, jQuery, AJAX, HTML5, CSS3, and Bootstrap.
- Implemented backend validations, session management, and secure CRUD operations.
- Collaborated in Agile development using Git for version control and Jira for issue tracking.

Projects

Brain Tumor Classification

Technologies: Python, OpenCV, Flask, Logistic Regression, SVM.

- Developed an MRI image classification model using Logistic Regression and SVM.
- Built a Flask-based prediction interface.

Bike Price Prediction

Technologies: Python, Random Forest, Pandas, NumPy

- Built a Machine Learning model using Random Forest Regressor to predict bike prices.
- Evaluated performance using MAE, MSE, and RMSE metrics.

Journalify – Journal Publication Management System

Technologies: Java, Spring Boot, MySQL, JPA, REST APIs

- Developed RESTful APIs using Java Spring Boot with layered architecture and MySQL database.
- Designed and integrated MySQL database using JPA.
- Implemented CRUD operations for journal management.

Education

Master of Computer Applications (MCA)

Mar 2023 – Sep 2024

Visvesvaraya Technological University, Karnataka — CGPA: 8.9/10

Bachelor of Computer Applications (BCA)

Jun 2019 – Oct

2022

Rani Channamma University, Karnataka — CGPA: 8.1/10

Certifications

- Java Full Stack Certification
- NPTEL – Programming in Java
- Career Essentials in Generative AI by Microsoft and LinkedIn
- Machine Learning Internship
